Welcome to Team 1 Trading

If you are relatively new to the trading world we have done a lot of work to reduce the complexity of trading and make it easier. If you are an experienced trader we provide ways to give you all the information you want and need while making it simpler. View a quick tutorial to see how it works.

Trade Now  New Account  Quick Tutorial
After creating a new account, the main page you see and return to will be this one. From here you can log in and go to either a practice account or a real money trading account.

Notice the Red to Green Buttons in the background. Continue to find out what they do.
This is the screen you will see after logging in. Each button displays a stock symbol with its current price and a number indicating how likely the price will go up or down. The colors red and green indicate which direction the price is likely to move, green for up and red for down. The darker colors and higher indicator numbers, mean the price is more likely to move in the indicated direction.
Click on the button for the stock you are interested in trading. This will take you to a chart, detailed information, and the page to place an order.
Swiping up will reveal additional pages of data.

This is the chart page. You can swipe up for additional information tables and news, or you can swipe down to go back. Continuing to swipe up will take you to other info.
Have enough information and want to make a trade? Simply click this button from any of the chart and info pages and it will allow you to directly place a trade on the stock you were viewing. Let's go there now!
Trade initiation pages. Notice the difference? One trades in real dollars and one trades in cyber cabbages. One makes you real money and one is just for practice. Depending on which button you clicked at login you will have arrived at one or the other. It is easy to switch between them though. Let's have a closer look.
When you see cabbages instead of dollar signs, you are at the Cyber Cabbage practice account trading page. Both real money and practice trading pages function the same except unfortunately Cyber Cabbages are only good for practice.
Before every order is placed, you get a second chance to preview it to make sure it is correct. Notice this time you see dollar signs and a white background? This means you are trading real money. Here you can choose to place the order, change it or cancel it. It doesn't get much more basic than that.
Each order will display a confirmation upon successful completion.

Thank you. Your order has been placed. Here is your confirmation number.
