This document has been prepared to meet the requirements of the U.S. OSHA Hazard Communication Standard, 29 CFR 1910.1200; the EC directive, 2001/58/EC and other regulatory requirements. The information contained herein is for the concentrate as packaged, unless otherwise noted.

1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: FURADAN® 4 F Insecticide/Nematicide
PRODUCT CODE: 279
ACTIVE INGREDIENT(S): Carbofuran
CHEMICAL FAMILY: Carbamate Pesticide
MOLECULAR FORMULA: C_{12}H_{15}NCO_{2}(carbofuran)
SYNONYMS: FMC 10242; 2,3-dihydro-2,2-dimethyl-7-benzofuranyl methylcarbamate; IUPAC: 2,3-dihydro-2,2-dimethylbenzofuran-7-yl methylcarbamate
ALTERNATE PRODUCT NAME(S): Carbodan 48 F; Curater 4 F; Curater 47; Furadan 47 F; Furadan 48 F, Furadan 480 F; Furadan 480 g/L SC; Furadan 4 Flo

MANUFACTURER
FMC CORPORATION
Agricultural Products Group
1735 Market Street
Philadelphia, PA 19103
(215) 299 6000 (General Information)

EMERGENCY TELEPHONE NUMBERS
(800) 424-9300 (CHEMTREC - U.S.A. & Canada)
(202) 483-7616 (CHEMTREC - All Other Countries)
(800) 331-3148 (FMC - U.S.A. & Canada)
(716) 735-3765 (Reverse charges - FMC)

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW:
- Creamy off-white liquid suspension with a mildly phenolic odor.
- Slightly combustible. May support combustion at elevated temperatures.
- Degrades at temperatures above 130°C (266°F).
- Thermal decomposition and burning may form toxic by-products.
- For large exposures or fire, wear personal protective equipment.
- Highly toxic to fish and aquatic organisms. Keep out of drains and water courses.
- Highly toxic if swallowed, and could be highly toxic if absorbed through the mucous membranes of the eyes.
• It is expected to be highly toxic by inhalation.

**POTENTIAL HEALTH EFFECTS:** Effects from overexposure result from either swallowing, inhaling or coming into contact with the eyes or skin. Conditions of increased temperature and humidity may aid skin absorption of this product and, therefore, increase toxicity. Symptoms of overexposure include headache, light-headedness, weakness, abdominal cramps, nausea, excessive salivation, perspiration, blurred vision, tearing, pin-point pupils, blue skin color, convulsions, tremor and coma.

**MEDICAL CONDITIONS AGGRAVATED:** None presently known.

---

### 4. FIRST AID MEASURES

**EYES:** Immediately flush with water for at least 15 minutes, lifting the upper and lower eyelids intermittently. See a medical doctor immediately.

**SKIN:** Wash with plenty of soap and water. Get medical attention if irritation occurs and persists.

**INGESTION:** Drink 2 glasses of water and induce vomiting by touching the back of the throat with a finger. Never induce vomiting or give anything by mouth to an unconscious person. See a medical doctor.

**INHALATION:** Remove to fresh air. If breathing difficulty or discomfort occurs and persists, see a medical doctor. If breathing has stopped, give artificial respiration and see a medical doctor immediately.

**NOTES TO MEDICAL DOCTOR:** This product is highly toxic if swallowed, and has low dermal toxicity. It is expected to be highly toxic by inhalation. It is minimally irritating to the skin and practically non-irritating to the eyes, however, absorption through the mucous membranes of the eyes could be highly toxic. Carbofuran is a reversible cholinesterase inhibitor. Atropine sulfate is antitodal. Support respiration as needed with removal of secretions, maintenance of a patent airway and, if necessary, artificial ventilation. If cyanosis is absent: Adults - start treatment by giving 2 mg atropine intravenously or intramuscularly, if necessary, and repeat with 0.4 - 2.0 mg atropine at 15 minute intervals until atropinization occurs (tachycardia, flushed skin, dry mouth, mydriasis); Children under 12 - initial dose =
0.05 mg/kg body weight and repeat dose = 0.02 - 0.05 mg/kg body weight. Use of oximes such as 2-PAM is controversial. Observe patient to insure that these symptoms do not recur as atropinization wears off. If in eyes, instill one drop of homatropine. Treatment is otherwise controlled removal of exposure followed by symptomatic and supportive care.

5. FIRE FIGHTING MEASURES

**EXTINGUISHING MEDIA:** Foam, CO₂ or dry chemical. Soft stream water fog only if necessary. Contain all runoff.

**FIRE / EXPLOSION HAZARDS:** Slightly combustible. Carbofuran will burn if ignited and degrades at temperatures above 130°C (266°F).

**FIRE FIGHTING PROCEDURES:** Isolate fire area. Evacuate downwind. Wear full protective clothing and self-contained breathing apparatus. Do not breathe smoke, gases or vapors generated.

6. ACCIDENTAL RELEASE MEASURES

**RELEASE NOTES:** Isolate and post spill area. Wear protective clothing and personal protective equipment as prescribed in Section 8, "Exposure Controls/Personal Protection". Keep unprotected persons and animals out of the area.

Keep material out of lakes, streams, ponds and sewer drains. Dike to confine spill and absorb with a non-combustible absorbent such as clay, sand or soil. Vacuum, shovel or pump waste into a drum and label contents for disposal.

To clean and neutralize spill area, tools and equipment, wash with a bleach or caustic/soda ash solution. Follow this by washing with a strong soap and water solution. Absorb, as above any excess liquid and add to the drums of waste already collected. Repeat if necessary. Dispose of drummed wastes according to the method outlined in Section 13, "Disposal Considerations".

7. HANDLING AND STORAGE

**HANDLING AND STORAGE:** Store in a cool, dry, well-ventilated place. Do not use or store near heat, open flame or hot surfaces. Store in original containers only. Keep out of reach of children and animals. Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal.
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMITS

</table>

ENGINEERING CONTROLS: Use local exhaust at all process locations where vapor or mist may be emitted. Ventilate all transport vehicles prior to unloading.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: For splash, mist or spray exposure, wear chemical protective goggles or a face shield.

RESPIRATORY: For splash, mist or spray exposure wear, as a minimum, a properly fitted half-face or full-face air-purifying respirator which is approved for pesticides (U.S. NIOSH/MSHA, EU CEN or comparable certification organization). Respirator use and selection must be based on airborne concentrations.

PROTECTIVE CLOTHING: Depending upon concentrations encountered, wear coveralls or long-sleeved uniform and head covering. For larger exposures as in the case of spills, wear full body cover barrier suit, such as a PVC suit. Leather items - such as shoes, belts and watchbands - that become contaminated should be removed and destroyed. Launder all work clothing before reuse (separately from household laundry).

GLOVES: Wear chemical protective gloves made of materials such as rubber, neoprene or nitrile. Thoroughly wash the outside of gloves with soap and water prior to removal. Inspect regularly for leaks.

WORK HYGIENIC PRACTICES: Clean water should be available for washing in case of eye or skin contamination. Wash skin prior to eating, drinking or using tobacco. Shower at the end of the workday.

9. PHYSICAL AND CHEMICAL PROPERTIES

ODOR: Mildly phenolic

APPEARANCE: Creamy off-white liquid suspension

DENSITY / WEIGHT PER VOLUME: 8.91 - 9.32 lb/gal. (1070 - 1120 g/L)

MOLECULAR WEIGHT: 221.26 (carbofuran)
10. STABILITY AND REACTIVITY

CONDITIONS TO AVOID: Excessive heat and fire.

STABILITY: Stable

POLYMERIZATION: Will not occur

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon monoxide, carbon dioxide, nitrogen oxides, and methyl isocyanate.

11. TOXICOLOGICAL INFORMATION

EYE EFFECTS: Practically non-irritating

SKIN EFFECTS: Minimally irritating

DERMAL LD$_{50}$: 6,783 mg/kg (rabbit)

ORAL LD$_{50}$: 7.34 mg/kg (rat)

INHALATION LC$_{50}$: Carbofuran: 0.10 mg/l (1 h) (rat)

ACUTE EFFECTS FROM OVEREXPOSURE: This product is highly toxic if swallowed, and has low dermal toxicity. It is expected to be highly toxic by inhalation. It is minimally irritating to the skin and practically non-irritating to the eyes, however, absorption through the mucous membranes of the eyes could be highly toxic. With dermal exposure to this product, conditions of increased temperature and humidity facilitate skin absorption and, therefore, promote increased toxicity. Carbofuran is a reversible cholinesterase inhibiting pesticide, which elicits symptoms in humans typical of cholinesterase inhibition including headaches, light-headedness, weakness, abdominal cramps, nausea, excessive salivation, perspiration and blurred vision. More severe signs of cholinesterase inhibition include tearing, pin-point pupils, excessive respiratory secretions, cyanosis, convulsions, generalized tremor and coma. Excessive exposure may result in death. In humans, ingestion of large amounts of propylene glycol has resulted in symptoms of reversible central nervous system depression including stupor, rapid breathing and heartbeat, profuse sweating and seizures.

CHRONIC EFFECTS FROM OVEREXPOSURE: No data available for the formulation. In studies with laboratory animals, carbofuran did not cause reproductive toxicity, teratogenicity, or carcinogenicity. Chronic exposure of laboratory animals to carbofuran has caused decreased cholinesterase activity (erythrocyte, plasma, and/or brain). An overall absence of genotoxicity has been demonstrated in mutagenicity testing with carbofuran. Repeated overexposure to propylene glycol can produce central nervous system depression, hemolysis and minimal kidney damage.
12. ECOLOGICAL INFORMATION

Unless otherwise indicated, the data presented below are for the active ingredient.

ENVIRONMENTAL DATA: Carbofuran has a moderate rate of degradation in soil (half-life = 50 days). It undergoes rapid hydrolysis under alkaline (high pH) conditions, but is stable at acidic (low) pH. Carbofuran has a Log Pow of 1.4 and a bioconcentration factor of 9 (low potential for environmental accumulation). It may be mobile in soil, especially soils with a high sand content and, therefore, has a potential to contaminate groundwater. In heavier textured soils, the mobility of carbofuran is expected to be moderate.

ECOTOXICOLOGICAL INFORMATION: With LC_{50} values between 5.3 to 36 µg/L to fish and aquatic arthropods in the laboratory, this product is considered highly toxic. Care should be taken to avoid contamination of the aquatic environment. It is also considered highly toxic to waterfowl and upland game birds, and has an oral LD_{50} of 2.67 to 10.75 mg/kg. Carbofuran is easily metabolized and, because it is a rapidly reversible cholinesterase inhibitor, recovery from symptoms of sublethal exposure occurs quickly.

13. DISPOSAL CONSIDERATIONS

DISPOSAL METHOD: Open dumping or burning of this material or its packaging is prohibited. If spilled material cannot be disposed of by use according to label instructions, an acceptable method of disposal is to incinerate in accordance with local, state and national environmental laws, rules, standards and regulations. However, because acceptable methods of disposal may vary by location and regulatory requirements may change, the appropriate agencies should be contacted prior to disposal.

EMPTY CONTAINER: Non-returnable containers that held this material should be cleaned, prior to disposal, by triple rinsing. Containers which held this material may be cleaned by being triple-rinsed, and recycled, with the rinsate being incinerated. Do not cut or weld metal containers. Vapors that form may create an explosion hazard.

FEDERAL INSECTICIDE FUNGICIDE RODENTICIDE ACT
U.S. EPA Signal Word: DANGER-POISON

INTERNATIONAL LISTINGS
Australian Hazard Code: 3XE

HAZARD, RISK AND SAFETY PHRASE DESCRIPTIONS:

Carbofuran:

EC Symbols: 
T+ (Very Toxic)
N (Dangerous for the environment)

EC Risk Phrases: 
R26/28 (Very toxic by inhalation and if swallowed)
R50/53 (Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.)

EC Safety Phrases: 
S1/2 (Keep locked up and out of reach of children.)
S36/37 (Wear suitable protective clothing and gloves.)
S45 (In case of accident or if you feel unwell, seek medical advice immediately - show the label where possible.)
S60 (This material and its container must be disposed of as hazardous waste)
S61 (Avoid release to the environment. Refer to special instructions/safety data sheets.)
