Be an Activist!

Make a Difference.
While researching historical and cultural contributions and trends of women in technology fields, this project-based course will guide you through the planning and implementation of an activism project to promote the development and use of technology to women and girls around the globe.

In just 10 weeks, you'll:
• Learn about biases in technology, education, and industry.
• Discuss important readings and media online.
• Research, plan, and write about an activism project.
• Setup and use a professional web site.
• Use a variety of business applications.

Register for Spring 2013 right away!
• No textbooks! Readings are delivered online.
• 3 credits, offered online! Register online
